

Boundary and Tidal Water Survey Hillsborough County, Florida

Legend & Abbreviations

- Found Concrete Monument
- Set 5/8" Capped Iron Rod
- # Number
- No. Number
- CP Control Point
- (D) Deed Reference
- (F) Field Measurement
- P.S.M. Professional Surveyor and Mapper
- Id. Identification
- LB Licensed Business
- FDEP Florida Department of Environmental Protection
- OR Official Records
- TBM Temporary Benchmark
- ⊕ Temporary Benchmark
- NGS National Geodetic Survey
- PID Permanent Identifiers
- Round Post
- ⊗ Sign
- ⊕ Mean High Water Corner
- |— Guardrail

Basis of Bearing Detail

SurvTech has produced a Mean High Water Boundary survey based on the conditions in the field on 06/22/20. SurvTech is NOT determining ownership of the "upland" area (area above mean high water elevation), because we believe there has been dredging and filling activity that has taken place to create the size, shape, and location of the island, and depending on where and when the island was filled or dredged, there may be areas above or below the MHW line that are sovereign or privately owned. SurvTech has contacted the Florida Department of Environmental Protection (FDEP) and Port Tampa Bay (Tampa Port Authority) for information on possible dredging and filling activities in the vicinity of Pine Island. The FDEP has stated that they don't have any such information. At this time we are still waiting for a response from Port Tampa Bay. The current configuration of the island does NOT match historical charting from the 1940's, when the parcel was originally conveyed out of sovereign ownership. Without historical records, such as aerials, dredging and fill permits, or maps, it is impossible to determine ownership of the island. SurvTech believes that more information does exist, and would revisit the island boundary at such a time as the information is made available. There also possibly exists a dredge and fill easement that encompasses a portion of this island, but we have not found any documents that delineate the dredge and fill easement limits.

Surveyor's Notes

- 1.) Paper copies of this survey are not valid without the original signature and raised seal of a Florida Licensed Surveyor and Mapper. Digital copies are not valid without the digital signature of a Florida Licensed Surveyor and Mapper.
- 2.) The bearing structure for this survey is based on a NAD 1983 Florida State Plane West Zone, bearing of N 42°08'57" E between NGS Control Points "872 6537 J Tidal" and "Faraghan".
- 3.) The horizontal datum utilized for this project is NAD 1983 Florida West Zone, 2011 Adjustment, U.S. Survey Feet. The control utilized to establish said datum was "Faraghan" being NGS (National Geodetic Survey) Horizontal Control Station.
- 4.) The vertical datum utilized for this project is NAVD 1988, U.S. Survey Feet. The benchmark utilized was National Geodetic Survey (NGS) Control Station "872 6537 J Tidal" with an elevation of 6.99 feet.
- 5.) All control coordinate values determined using RTK GNSS 180 epochs from established control, with a horizontal and vertical accuracy of 0.15 feet.
- 6.) Vertical coordinate values for NGS "Faraghan" established with RTK GNSS 180 epochs on NGS "872 6537 J Tidal".
- 7.) Horizontal coordinate values for NGS "872 6537 J Tidal" established with RTK GNSS 180 epochs on NGS "Faraghan".
- 8.) No underground foundations or footers were excavated or located for this survey.
- 9.) This Survey has been performed without benefit of title policy or abstract. Therefore surveyor can make no guarantees to ownership or encumbrances. There may be additional easements and restrictions that can be found within the Public Records of Hillsborough County.
- 10.) The Mean High Water Elevation of 0.55 feet NAVD 1988 was approved by Florida Department of Environmental Protection at the project site for boundary purposes.
- 11.) This Tidal Water Survey complies with Chapter 177, Part, Florida Statutes.
- 12.) Ownership of the upland boundary has not been determined.
- 13.) The shoal area was determined to be the lands lying between the elevation of (-) 10.00 feet and the Mean High Water Line elevation of 0.55 feet and was taken from the Aerial Topographic and MultiBeam Hydrographic Survey Pine Key by SurvTech Solutions with a drafted date of 08/04/20, a field date of 07-13-20, Phase 1H and 1A.

Control Tabulation

Tampa Bay

Pine Key as it Exists Today
 Total Acreage (Upland)
 386551.46 Square Feet
 8.874 Acres
 Acreage Described is Area Above the Mean High Water Line

SurvTech's professional opinion as to the limits of the "shoal" area.
 Shoal Area Elevation -10.00 feet, (NAVD 1988) as located on 07/13/20
 See Detail "C"

SurvTech's professional opinion as to the limits of the "shoal" area.
 Shoal Area Elevation -10.00 feet, (NAVD 1988) as located on 07/13/20

Mean High Water Elevation 0.55 feet, (NAVD 1988) as located on 06/22/2020

Total Acreage (Upland)
 386551.46 Square Feet
 8.874 Acres
 Acreage Described is Area Above the Mean High Water Line

Total Acreage (Shoal Area)
 3018820.76 Square Feet
 69.303 Acres
 Acreage Described is Area Above the (-) 10.00 foot contour elevation

Total Acreage (Shoal Area Less Upland)
 2632269.30 Square Feet
 60.429 Acres
 Acreage Described is Area Above the Shoal Area and below the Mean High Water Line
